ABOUT ME

I am a Frontend Developer with 4+ years of experience, passionate about technology and programming. I deliver clean, scalable, and maintainable web applications.

EXPERIENCE

Frontend Developer

Seiza-SPA (Banco de Chile)

2022-PRESENT

- As a Frontend Developer, I have participated in the creation and maintenance of the internal components kit, implementing modern practices and clean code principles, achieving simple, easy-to-implement, reusable, and long-lasting development.
- I led the migration of Banco de Chile's visual components documentation from Angular 11 to Angular 17. This process enabled development teams to adopt newer framework versions, incorporating updated tools, performance improvements, and advanced security standards.
- Additionally, I have developed multiple modern user interfaces, implementing reusable components and integrating data through the use of APIs, thereby ensuring seamless communication with the backend. These tasks are complemented by the creation of unit tests with Jasmine, which ensure code quality.

Web Developer

Pacific Fitness GYM

2019-2020

- I managed the entire web portal, creating and updating various sections, from informational sites to payment gateways implementing Getnet and WebPay. This effort resulted in a significant increase in plan subscriptions through the website.

Web Developer | Freelance

Comunicaciones Vetesla

2016-2019

- As a freelancer, I developed web applications such as landing pages, informational sites, e-commerce platforms, and WordPress-based administrable websites. Additionally, I implemented payment gateways like WebPay, GetNet, MercadoPago, and PayPal throughout various projects.

SKILLS

Skills: Angular, React, TypeScript, JavaScript, Bootstrap, Tailwind CSS, Unit Tests (Jasmine, Karma), RxJS

PROJECTS

Weatherio

2020

Project that consumes an API allowing users to check the current weather of any city through an input field or by giving their location. Demo: <https://weatheriooo.vercel.app/>

EDUCATION

Udemy,

2020

Angular: de cero a experto

Platzi,

2019
